

CYTOFLEX®

TI-ENFORCED®

Titanium Reinforced ePTFE Membrane

Cytoflex® Ti-Enforced® membranes are designed to achieve predictable outcomes for GBR procedures. The synergistic combination of ePTFE membrane, Titanium frame and surface texture generates an optimal space-making barrier. Cytoflex® Ti-Enforced® membranes are available in perforated & non-perforated options. The perforated version exhibits macro holes that allow for direct vascularization across the membrane.

Tissue Friendly ePTFE membrane

Easily shaped Titanium frame

Holes for direct vascularization

Perforated Ti-Enforced® Membranes

C06-0901
19x26mm

Buccal
for buccal defects

C06-3501
20 x 25
x 36mm

**Posterior
Single Winged**
for posterior
extraction sites

C06-1301
20 x 25mm

Posterior Single
for posterior
extraction sites

C06-3901
25 x 30mm
x 41mm

**Posterior Large
Winged**
for large
bony defects

C06-1701
25 x 30mm

Posterior Large
for large bony
defects

C06-4101
32 x 40mm

Extra Large
For very large
bony defects
